BoogyMan Shuffle

When you walk away like the Buddha with the twinkle
of a little lie
I still dig your boogyman shuffle walk on up to i
Sometime you got magic wings and a black marble
crystal ball
I love it when you do those things they don't make no
sense at all
Time be in your corner take your time and corner me
And ill take a moment to show you what your crystal
ball aint seen
The smile of the desert wind, wisdom of the harvest
moon
Ill bring around ill say it again I still dig your boogyman
shuffle

I was preoccupied I was studying the gods
Wasn't expecting you from whence you came but you
came against the odds
The odds were in my favor for those things that favored
me
I witnessed your behavior and I believe what I received
A shakespear lie
Sunshine at midnight
So bright I just might go blind

Your riddle when unraveled threatened to sanitize my
brain
Had to ration out my reason or beware
Science mystifies the gods and hallowed be thy name
There's a season of passion in your lair

You will drive me nuts from dust to dawn until im dust
And the worms feed off my skull lost in my hair
You will mystify me tho I know your half insaine

But the way those feathers ruffle I still dig
Your boogyman shuffle

Blindating pleasures nervous breakdown calm
Nerves that breakdown barriers it's the revolution now
Show me whats that you been
Hiding neath your smooth skin
I don't mind the way that whisky burn going down
Theres a fire neath the moon
Burn me right up on into
Your shakespear daydream
Sunshine at midnight
So bright I just might go blind

When you walk away like the Buddha with the twinkle
of a little lie
I still dig your boogyman shuffle walk on up to i
Sometime you got magic wings and a black marble
crystal ball
I love with you do those things they don't make no
sense at all
Time is in your corner take your time and corner me
And ill take a moment to show you what your crystal
ball aint seen
The smile of the desert wind, wisdom of the harvest
moon

Ill bring around ill say it again I still dig your boogyman shuffle
